

WASTE DISPOSAL POLICY

Clearers South East Ltd is an approved registered waste contractor and it is our policy to provide waste solutions which strictly apply to all industry legislation whilst considering the most environmentally responsible method of disposal. We aim to reduce the volume of waste sent to landfill and maximize re-use and recycling where possible in partnership with our customers and suppliers.

Clearers South East Ltd fully comply with the waste producer's obligation to Duty of Care regulation 1996 through a full audit trail for all waste removed. This is completed in the form of a "waste transfer note" and shows the name and address of where the waste is being generated. On the removal of the skip/container the form is signed by the waste producer which details the nature of the waste as categorized by the European Commission's E.W.C Codes. This is then signed at the point of transfer or disposal which will be a licensed Materials Recycling Facility or Landfill.

In the transfer of any hazardous waste, Clearers South East Ltd only disposes of the waste at appropriate licensed sites. All special arrangements and analysis required for the specific waste type are adhered to. Clearers South East Ltd fully complies with the completion of the "consignment form" required by law for the transfer of any hazardous waste. On removal of the skip/container the form is completed and signed by the waste producer, then also by the licensed waste carrier. This is then finally completed by the licensed Materials Recycling Facility or Landfill and all parties are sent a copy of the consignment form.
